

CONSULTING

KENT J. JOHNSON, M.D. AND JAMES VARANI, PH.D.

- Experienced consultants in renal injury, cell culture, fibrosis, inflammation, and dermal biology
- Extensive academic and industrial investigations using *in vitro* and *in vivo* models
- Support of drug discovery and development programs at Warner-Lambert, Pfizer, Genentech, Medicis, Amgen, Quantum Immunologics, and Johnson & Johnson.
- Development of client-specific approaches that allow compound prioritization

PHARMACEUTICAL APPLICATIONS

- Testing approaches and biomarkers for renal injury and inflammation
- Options for human skin testing and disease characterization
- Diabetic modeling and mechanistic testing
- Human and preclinical species-specific considerations
- Research collaborations and access to specialized reagents
- Connections to key opinion leaders
- Opportunities outside of experience of internal scientists

Drs. Johnson and Varani maintain active research programs in addition to the services offered by JV Biolabs. Their extensive experience bases and professional networks allow clients to design strategies that optimize timelines and resources.
